Thank you for purchasing this vector map base from Maproom. The map is supplied in formats that have broad compatibility with graphics industry standards.

Your map is suitable for both digital and print work. Theoretically vector files can be scaled for output at any size, but we do not recommend for you to blow up your map much larger than 300% of its initial state because the coastlines and other paths will start to look inaccurate. Physical maps with hillshading layers will start to look pixellated if scaled up more than about 200%, particularly if being used for print work at 300dpi.

Maproom map bases are designed for easy customisation, whether you are a professional designer who wants to do advanced effects or a beginner who merely wants to change the colours and add a few place names. Tutorials and tips can be found on www.maproom.net.

If you have any queries, please email maproom@thamesidemedia.com. Our mission is always to offer the finest royalty-free map bases and we are continually striving to improve our products and services, so we welcome your feedback and suggestions.

We hope you enjoy using your Maproom map base.
